IEG PI NOTICE

No. 6-78

TITLE/SIGNIFICANCE:

Probable New Air-Launched Missile and Associated Shipping Container

COMMENT: A probable new air-launched missile was observed in the Akhtubinsk/Vladimirovka AAM Support Complex. The missile appeared to have a nose, delta-shaped forward control surfaces and clipped-delta aft control surfaces. The rectangular shipping containers in the immediate area may be associated with the probable new air-launched missile. No distinctive banding or marking was observed on the shipping containers. The missile was partially obscured by halation and shadows. The following sketches, complete with mensural data, are PI concepts of the missile and the shipping container.
